## WELCOME

Welcome to NorthCoast Boats! On behalf of all of the craftsmen and women we thank you for your interest in our boats and great company. We look forward to you joining our growing family of excellent dealers and proud boat owners.

Joe is one of the foremost, innovative, authorities in composite boat building and tool making. His passion for the sea is founded in his Portuguese heritage. He loves to work, his family works beside him daily, building better boats everyday, and during the summer months they can be found fishing on them after hours. (One of Joe's favorite Striper Salad recipes can be found on our lifestyle blog).

Joe decided to locate the production facility in the boat building capital of New England- Bristol, Rhode Island. Where we test new models with dealers and boat owners on beautiful Narragansett Bay.

NorthCoast Boats is a division of C&C Marine and C&C Fiberglass, Inc. C&C Marine is a premier boat builder producing high quality fishing and recreational boats.
J-Boats, and other iconic brands, continue to rely upon C&C Marine for molded hulls and decks of their select high end models. During the nineties they were the builder behind the scenes for Dick Lema, (noted designer and previous Lema brand Owner). In 2000 the opportunity presented itself to purchase the Lema brand and hull molds. Shortly thereafter Lema was renamed NorthCoast Boats.
We honor our commitment to building quality fishing boats. We use them and we fish them so that we are confident that our valued customers cannot own a better built boat.

*"Our mission is to build quality boats that are seaworthy, sea-kindly, and built to last. We are proud of NorthCoast's solid reputation for rugged durability, great service, at the right price. Word of our quality built boats continues to spread. NorthCoast Boats center console and cabin models provide Anglers and Cruisers our best selection ever."*

*Jose C. DaPonte*

# BOAT NOTES

## FISHING & CRUISING

### Pilot House | Helm

Ultimate protection from the weather to fish earlier or extend your season well into the fall. 360 degree visibility, opening front and sliding side windows, comfortable Helm and Companion seat, and an open back allows you to communicate with your guests. Aft canvas enclosure rolls down when needed. Plenty of storage below the seats and side pocket to store cell phones and sunglasses.

### Cabin | Head

The 215 has a forward cabin with full bulkhead and locking door. V-berth storage below, marine grade liner above, cabin hatch with screen, and for overnights we include cabin cushions, portable head, v-berth insert, and cabin lights for early trips.

## FEATURES

### Cockpit | Deck | Power

Cockpit is self bailing with courtesy lights, molded box storage, full transom, storage locker, bow rail, two tone deck sole. Fishing features include: live bait well, saltwater wash-down, four rod holders, tackle boxes with drawers, and hard top rocket launchers.

### Suzuki | Mercury | Yamaha

Reliability, innovation, and fuel efficiency: our outboard propulsion selection is exceptional. Covering a variety of engine brand loyalists needs and wants.

# WHY NORTHCOAST

## WHY DO KNOWLEDGEABLE BOATERS CHOOSE NORTHCOAST? HERE ARE JUST A FEW REASONS.

- NorthCoast Boats are built by excellent craftsmen and women. In fact, the same manufacturer, C&C Marine, is currently celebrating twenty years in business, makes J-Boats, and owns and builds NorthCoast Boats.
- All of the quality, materials, and craftsmanship, at the right price.
- We fish and love being on the water- so we get it. You want a smooth, dry ride, with rod holders, tackle boxes, and conveniently placed "catch all "areas, right where you need them to be.
- Our boats are built rugged, versatile, and designed to perform in sea conditions others run from.
- We are a semi-custom builder. We provide a wide variety of opportunities for you to personalize your new boat to exactly what you have been dreaming about.
- Select from our wide variety of colored gelcoat for the hull and molded contrasting nonskid.
- You will also find our boats are larger than most in their class with abundant cockpits, space to move around without bumping into each other, and always somewhere to lean while fighting the big ones.
- Our optional low-profile bow rails, hand-crafted cushions, insulated storage boxes, and pop up hardware also assist in keeping everyone happy and very comfortable.
- Blue live wells are designed to keep your bait happy and alive longer.
- The hulls are aggressive in that they cut the water like a knife and sit comfortably when drifting.
- When you look at the entire NorthCoast line up it is easy to see why our high gunnels and classic shear lines attract professional Captains, Guides and Fishermen.

For more information please check with our Dealers for availability and set an appointment to get onboard!
